Assess in Applied Science-Transfer Nursing Outcomes

Students will demonstrate outcomes in each of the following areas:

**Nursing**
By the end of the program the graduate will:

1. Demonstrate compassionate, patient **centered care** to patients across the lifespan while integrating patient preferences, values and needs.
2. Utilize **best current evidence** to make appropriate and timely **clinical judgment**.
3. Provide **quality care** by minimizing risk of harm to patients and utilizing standardized **safe practices**.
4. **Collaborate** with patients, their support systems and the **health care team** to achieve optimal health outcomes.
5. Integrate **information and technology** into practice to communicate, enhance knowledge, decrease errors and support decision making.
6. Implement one’s role with accountability, commitment to caring, legal and ethical responsibility and respect while adhering to standards of **professional** practice as a **leader and manager** of care.

**Communication**
After successfully completing the written communication requirement, students will:

1. Demonstrate literal and inferential comprehension.
2. Communicate clearly and effectively in appropriate contexts.

**Quantitative/Symbolic Reasoning**
After successfully completing the quantitative skills requirement, students will:

1. Apply algebraic, analytic, geometric or statistical reasoning to solve abstract and applied problems appropriate to an individual discipline.
2. Interpret mathematical, quantitative or symbolic models such as formulas, graphs and tables, and draw inferences from them.
3. Employ basic symbolic or quantitative reasoning to support a position or conclusion.

**Health/PE Outcomes**
After successfully completing the PE requirement, students will:

1. Understand and articulate the various elements of fitness (e.g., cardiovascular endurance, strength, flexibility, body composition).
2. Understand, articulate, and evaluate how various factors (e.g., genetics, diet, activity) promote health and wellness.
3. Understand and practice safe workout practices.
4. Identify, understand, evaluate, and apply appropriate fitness strategies (e.g., diet, exercise).

Choice of Ten Credits from Transfer Distribution Areas may result in any combination of the following outcomes:

**Humanities**
After successfully completing the humanities distribution requirement, students will:

1. Demonstrate literal and inferential comprehension.
2. Communicate clearly and effectively in appropriate contexts.
3. Understand and interpret human achievements in various forms.
4. Analyze and synthesize meaning in verbal, visual and/or auditory media.

**Social Science**
After successfully completing the social science distribution requirement, students will:

1. Understand, articulate, and evaluate the similarities and differences between and among various social sciences.
2. Understand, articulate, and evaluate how various factors (e.g., social, personal/individual, historical, political, and economic) influence human behavior.
3. Understand, articulate, and evaluate the applicability of significant theoretical perspectives (e.g., conflict theory, feminist theory, cognitive behavioral theory) as they relate to contemporary social issues.
4. Identify, understand, evaluate, and apply research literature from multiple social science disciplines.

**Science**
After successfully completing the science distribution requirement, students will:

1. Understand the nature of science, including the role of observation in the development of scientific theories and laws;
2. Use the languages of science to interpret and communicate scientific information;
3. Use scientific knowledge to analyze and evaluate data and solve problems; and
4. Obtain and analyze experimental data.
