

Math Resources

Your Instructor

Your instructor is willing to help! Drop by his or her office during office hours; make an appointment, call, or email. Instructors are there to help students; just ask.

Tutoring Center Tutors

If the Tutoring Center is open, there is a tutor who can help with basic math and up. Often there is a tutor to help with higher levels of math too. Check the schedule on our website for specifics www.ghc.edu/instruction/tutoring-center. You don't have to make an appointment to see a tutor, just drop in and ask for help. The Tutoring Center is located on the first floor of the library building (1519).

Your Classmates

Form a study group with classmates. Working together can increase your understanding of the material. During the first week of class, exchange contact information with a classmate so you have a partner to rely on.

Interact Math

Students in math 70, 95, and 98 have free access to the Interact Math website through their textbook. www.interactmath.com You can get help with homework problems, work extra problems, take practice tests, and ask for hints along the way.

eTutoring

GHC is a member of the Northwest eTutoring Consortium. You may work with a math tutor online through either email or chat (scheduled hours). Go to <http://www.etutoring.org>, and log in to the Northwest eTutoring Consortium, choose Grays Harbor College, and use your SID to log in.

Learning Links

The staff of the GHC Tutoring Center has compiled a list of helpful math websites covering all levels of math. We found these sites to be easy to use, relevant to GHC students, and free. See our list at www.ghc.edu/instruction/learning-center/learning-links.

Old Edition Textbooks

You may borrow out of use textbooks from the GHC Tutoring Center. We have textbooks at all levels and are glad to lend them out. Stop in and ask the Tutoring Center staff. First floor of the library building (1519).

You-Tube

Go to www.youtube.com and search for a topic you want help with. You'll be amazed at how many math professors have posted videos of themselves teaching math topics . Not sure what search words to use? Try the name of the section or chapter you are working on.

Internet Search

Try putting the topic you are trying to learn about into a search engine such as Google www.google.com. There are many sites that were designed to help students with math. Not sure what search words to use? Try the name of the section or chapter you are working on.
